

--- Clearstick 505 ---

Clearstick 505 soapsticks are a blend of foam stabilizers and anionic surfactants; designed to unload brines and fresh water from gas wells, while reducing hydrostatic back pressure on the formation. This in turn allows for improved gas production without the extra expense of a service rig, or swabbing jobs due to water loading.

--- Applications ---

Clearstick 505 works exceptionally well in fresh water, brine water and light hydrocarbons

--- Storage ---

Keep container closed and store in cool dry place out of direct sunlight

--- Physical Properties ---

Active: 70%

Appearance: white waxy solid stick

Odor: little or none

Initial Boiling Point: 482°F (250°C)

Solubility In Water: 100%

Dimensions: 1.36 X 16 in blue cardboard tube; 1.36 X 16 in water-soluble paper enclosed tube; 1.192 X 16 in water-soluble paper encased tube

--- Packaging/Availability ---

30 per box 1.36

64 per cooler 1.36

30 per box 1.192

80 per cooler 1.192
